Genaro Suárez

Supervision and Mentorship Experience

(as of October 19, 2026)

Supervisor/co-supervisor of 4 graduate students, 1 visiting researcher, 11 undergraduate students, and 14 high-school students.

Research Supervision

Graduate Students

Sep. 2026–present, New York, NY, USA — **(4). Supervisor** of master's student Gerally Medina Rivera, CUNY. Project: **Latitudinal Variations of Gas and Grain Species in Ultracool Atmospheres.**

Sep. 2026–present, New York, NY, USA — **(3). Supervisor** of master's student Alejandra Ross, CUNY. Project: **Searching for New Exoplanet Analogs with Archival JWST MIRI Images.**

2023–2024, New York, NY, USA — **(2). Supervisor** of master's student Alexandra Baldelli, Columbia University (*now Ph.D student at University of Delaware*). Project: **Disentangling the Effects of Temperature, Clouds, and Gravity on K I Doublet in L Dwarfs.** (A. J. Baldelli, G. Suárez, et al. 2025)

2022–2024, Montevideo, Uruguay (Virtual) — **(1). Co-supervisor** of master's student Rafael Bertolotto, Universidad de la República, Uruguay (*now Ph.D student at University of Arizona*). Project: **The stellar initial mass function of nearby young moving groups.** (R. Bertolotto, J. J. Downes, G. Suárez, et al. 2025)

Visiting Researchers

Sep. 2026–present, New York, NY, USA — **(1). Supervisor** of Visiting Scientist Nicolas Posner at the American Museum of Natural History. Project: **Determining the Fundamental Physical Properties of Brown Dwarfs Using Data from Multiple Observatories.**

Undergraduate Students

Aug. 2026–present, Guatemala City, Guatemala (Virtual) — **(4). Supervisor** of undergraduate student Luis Diego Lopez Perez, Universidad de San Carlos, Guatemala. Project: **Determining the Fundamental Physical Properties of Brown Dwarfs Using Data from Multiple Observatories.**

2025–2026, New York, NY, USA — **(3). Supervisor** of undergraduate student Samuel Candero, Florida Atlantic University. Project: **Impact of Silicate Clouds on Water Visibility in Warm Extrasolar Atmospheres Using JWST.** (S. Candero, G. Suárez, et al. 2026, in preparation.)

2023–2024, New York, NY, USA — **(2). Supervisor** of undergraduate student Jolie L'Heureux, Columbia University (*now Ph.D student at CUNY*). Project: **Inspecting Cloudy Substellar Atmospheres with JWST MIRI Synthetic Magnitudes from Spitzer Mid-infrared Spectra.** (J. L'Heureux, G. Suárez, et al. 2026.)

2022–2024, New York, NY, USA — **(1). Co-supervisor** of undergraduate student Sherelyn Alejandro Merchán, CUNY (*now Ph.D student at CUNY*). Project: **A Near-complete Spectral Energy Distribution for 2MASS J04151954-0935066 Using JWST.** (S. Alejandro Merchan, J. Faherty, G. Suárez, et al. 2025)

Summer Undergraduate Students

Jun.–present 2026, New York, NY, USA — **(8). Supervisor** of student Theo Olsen, Vassar College. Project: **The Role of Rotation Period in the Latitudinal Cloud Distribution of Warm Brown Dwarfs.** (T. Olsen, G. Suárez, et al. 2026, in preparation.)

Jun.–Aug. 2026
New York, NY, USA
(7). Supervisor of TEAM-UP Together Undergraduate Research Fellowship (TURF) student Melanie Encinas Mendoza, Virginia Tech. Project: **Evaluating Atmospheric Models of Brown Dwarfs and Gas Giants.**

Jun.–Jul. 2026
New York, NY, USA
(6). Supervisor of REU student Frankie Elise Rhodes, University of Missouri Columbia. Project: **Analysis of the Mid-infrared Water Absorption Feature in JWST Spectra of Brown Dwarf Atmospheres.**

Jun.–Jul. 2025
New York, NY, USA
(5). Supervisor of REU student Samuel Candero, Florida Atlantic University. Project: **Impact of Silicate Clouds on Water Visibility in Warm Extrasolar Atmospheres Using JWST.**

Jun.–Jul. 2024
New York, NY, USA
(4). Supervisor of REU student Savaria Parrish, Virginia Tech. Project: **Characterizing the Atmospheres of L-T Transitionary Brown Dwarfs Using JWST Observations and Atmospheric Models.** *Student received an AAS Chambliss Award.*

Jun.–Jul. 2023
Ensenada, BC, Mexico
(3). Supervisor of Carlos Ricardo Martínez Verduzco, Instituto Tecnológico de Los Mochis, during the XXXII Verano OAN-SPM. Project: **Deriving Masses of Low-Mass Stars.**

Jun.–Jul. 2018
Ensenada, BC, Mexico
(2). Supervisor of Carlos Alí Medina Leal, Universidad de Sonora, during the XXVII Verano OAN-SPM. Project: **Analysis of Low-Resolution Optical Spectra for Low-Mass Stars in Orion.**

Jun.–Jul. 2017
Ensenada, BC, Mexico
(1). Supervisor of Sandy González Rivera, Universidad Autónoma de Baja California, during the XXVI Verano OAN-SPM. Project: **Spectral Type Classification of a Number of Low-Mass Stars.**

High School Students

Sep. 2026–present
New York, NY, USA
(6). Supervisor of high-school students Luca Inamoto Martinez and Alexander H. on the project **Measuring Fundamental Parameters of Extrasolar Worlds from Their Light** as part of SRMP, AMNH.

Sep. 2025–Jun. 2026
New York, NY, USA
(5). Supervisor of high-school students Jannatul Urmi (East Bronx Academy), Luca Dentrone (Saint Ann's School), and Timothy Ebegbe (Brooklyn Technical High School) on the project **Sand in the Sky: Its Impact on Exoplanet Analog Atmospheres** as part of SRMP, AMNH. (Poster)

Sep. 2024–May 2026
Nebraska, US (Virtual)
(4). Supervisor of high-school student Kaylin Miller (Lyons-Decatur Northeast Schools) on the project **The Influences of Metallicity and Temperature on Atmospheric Composition of Exoplanets**

Sep. 2024–Jun. 2025
New York, NY, USA
(3). Supervisor of high-school students George Enache (Manhattan Center for Science and Math), Jadyn Torres (St Jean Baptiste High School), and Andy Zou (Franklin D Roosevelt High School) on the project **Exotic sandy clouds in young and old exoplanets** as part of SRMP, AMNH. (Poster)

Sep. 2023–Jun. 2024
New York, NY, USA
(2). Supervisor of high-school students Alexandria Davis (Young Women's Leadership School) and Bedanga Gautam (Manhattan Center for Science and Mathematics) on the project **Weighing Stars: How do we know how heavy stars are?** as part of SRMP, AMNH. (Poster)

Sep. 2022–Jun. 2023
New York, NY, USA
(1). Supervisor of high-school students Will Li (The Bronx High School of Science), Theo Olsen (LaGuardia High School), and Jiayu Yan (Stuyvesant High School) on the project **How Many Sun-like Stars Exist for Every Massive Star** as part of SRMP, AMNH. (Poster)

Academic Mentorship and Guidance

Graduate Student Mentoring

May. 2026–present
Dublin, Ireland
(Virtual)

(3). Mentor to Ph.D. student Maddie Lam, Trinity College Dublin, on the analysis of a brown dwarf viewed pole-on with an unexpected cloudy atmosphere.

May. 2026–present
Dublin, Ireland
(Virtual)

(2). Mentor to Ph.D. student Barry O Donovan, Trinity College Dublin, on the modeling of a brown dwarf with a dusty atmosphere.

2025–present
New York, NY, USA

(1). Mentor to Ph.D. student Sherelyn Alejandro Merchán, CUNY, on the analysis of brown dwarf spectral energy distributions.
